OREGON CITY, ORE.

Working Tight Places

Feb. 12, 1945

Governor Earl Snell,
Salem, Oregon.

Cultivating 2 Rows

Dear Sir,

There is a lot of people, in business as well as farmers who are genuinely concerned about the return of the Japs to this district at this time. I know that you probably have heard more from those favoring their return but believe the majority feel that they should not be allowed back at this time.

Combining

I believe you as Governor can help by throwing your weight against letting them infiltrate back now. As Governor you would be concerned about the possibility of violence by hot-heads which in turn would hazard the American prisoners of war held by the Japs.

General Cultivator

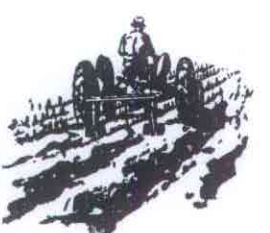

The Clackamas Implement Dealers Ass-n are in accord with this expression and believes that if you would come out for a strong policy you would gain in stature. The policy of appeasement and pussy-footing should be an example not to follow.

Thanking you for your kind and careful consideration,

Yours Very Truly,
Harold Barr.
